Micronet SP926

Wireless Media Projector Server

Proudly present Micronet SP926, Wireless Media Projector Server, ideal solution for an easy installation, convenient operation and user friendly projecting device. It allows normal wired conference environment to upgrade to wireless connectivity. Users no longer require sharing a single VGA cable nor do they require any Ethernet cable for Internet connection. SP926 is also designed to work as an Access Point for servicing Internet connection to wireless users. SP926 is a compact device that combines AP and Wireless Media Projector Server to provide a more convenient and professional conference environment.

Key Features

- Provide dual-function for wireless presentation and access point on a single device

- Provide video streaming where decoding is performed on the device to achieve real-time video playback and minimized stress on PC

- Compatible with any type of projectors with standard VGA connectors

- Utilize driver-free environment where USB token can be used to prevent file installation on PC/Notebook

- Provide conference control function allowing hosting of moderate meetings

- Provide robust security with session login code and wireless WEP key
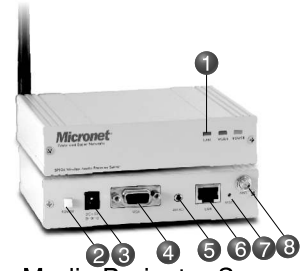

Wireless Media Projector Server
